Vážená chovateľská a odborná verejnosť, priaznivci chovu hovädzieho dobytka na Slovensku,

kontrola úžitkovosti plnila za celé svoje obdobie vždy významné funkcie. Predovšetkým slúži potrebám chovateľa, ktorým poskytuje podklady pre objektívnu, efektívnu negatívnu a súčasne pozitívnu selekciu v chovoch, umožňuje požadovanú úpravu kŕmnych dávok, napomáha procesu zlepšovania reprodukcie v chovoch a v neposlednej rade prináša chovateľovi informácie vedúce k lepším ekonomickým výsledkom.

Osobitnou kapitolou v chove hovädzieho dobytka je chov dojčiacich kráv. Chov dojčiacich kráv má niekoľko odlišností, ktoré ho v určitých podmienkach výrazne favorizujú pred chovom mliečneho dobytka, len je nutné s nimi kalkulovať a dokázať ich využiť v prospech chovateľa. Chov dojčiacich kráv by mal chovateľ začať s cieleným zámerom a nemal by to byť len únik z chovu dojných kráv.

Existuje množstvo ciest k zlepšeniu produkcie mäsa ako po stránke kvantitatívnej tak aj kvalitatívnej. Jedná sa o šľachtenie, výživu, starostlivosť o zdravie, marketing, management. Základným charakteristickým znakom sa stáva pravidelná cyklická reprodukcia s typickou sezónnosťou. Kontrola úžitkovosti je tu pre vás, aby vám bola nápmocná pri dosahovaní plánovaných úloh. Úspešnosť procesu šľachtenia v chovoch je do značnej miery závislá aj od informácií, ktoré chovateľ na svojej farme požaduje. Poradenská činnosť, ktorú pre chovateľa zabezpečujú odborní pracovníci vykonávajúci kontrolu úžitkovosti v spolupráci s partnerskými organizáciami podielajúcimi sa tiež na procese šľachtenia je v značnej miere spojená s analyzovaním výsledkov KÚ HD, k čomu slúži aj táto publikácia.

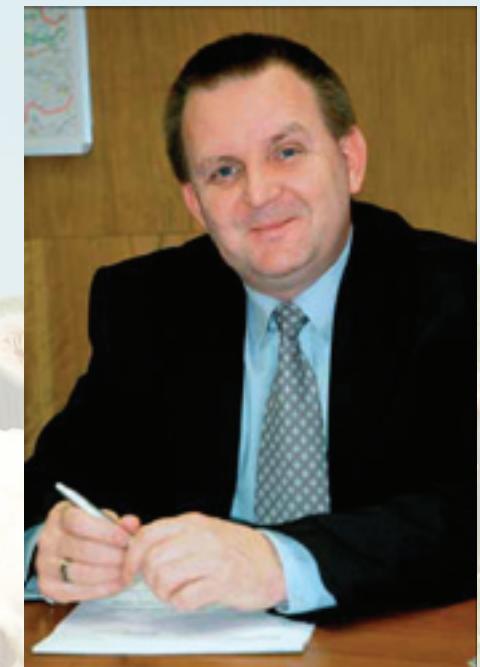

Sumarizácia a následne analýza výsledkov kontroly úžitkovosti mäsových plemien a dojčiacich kráv na Slovensku za dané kontrolné obdobie sa každoročne stáva udalosťou, ktorú očakáva chovateľská a odborná verejnosť.

PS SR, š.p. Vám prinášajú výsledky kontroly úžitkovosti za plemenársky rok 2011/2012 v publikácii, ktorá analyzuje výsledky podľa jednotlivých monitorovaných plemien a samozrejme v nej nájdete aj výsledky za svoje podniky.

Veríme, že aj táto publikácia prispeje k prehĺbeniu informovanosti, zvýšeniu úrovne chovu kráv a plemenárskej práce, ako aj k zvýšeniu rentability výroby mäsa na Slovensku.

V mene celého kolektívu odborných pracovníkov Plemenárskych služieb SR, ďakujem za spoluprácu a podporu chovateľom, ako aj našim partnerským organizáciám.

Celej chovateľskej verejnosti prajem chovateľský úspech v roku 2013.

Ing. Štefan Ryba, PhD
riadič

Plemenárske služby Slovenskej republiky, Š.p.

EKONOMIKA CHOVU MÄSOVÉHO DOBYTKA = CIELENÁ CHOVATEĽSKÁ A PLEMENÁRSKA PRÁCA.

Ing. Štefan Ryba, Ph.D., Ing. Marta Dianová

Chov špecializovaných mäsových plemien nemal na Slovensku tradíciu. Hovoriť aj dnes o tradícii je v porovnaní s chovateľsky vyspejšimi krajinami stále predčasné. Chovatelia z plemenárskeho hľadiska realizujú vo svojich stádach prevažne prevodné kríženie. Síce rýchlosť, ale finančne neporovnatelne náročnejší spôsob budovania stád nákupom čistokrvných mäsových plemien sa na Slovensku realizoval len sporadicky. Pri generačnom intervale päť rokov bude prekrižovanie našich stád mäsovými plemenami trvať dvadsať rokov. Už dnes vieme, že do roku 2013 vstúpime na Slovensku s počtom kráv v tejto kategórii na úrovni viac ako 50 000 ks. Pri zvyšovaní stavov kráv za posledné roky, sa preto s odstupom času ukazuje ako absolútne nedostatočne vynegociovaný národný limit, ktorý pre podporu prvovýrobcov v systéme chovu dojčiacich kráv predstavuje len 28 080 prémiových práv. Z plemenárskeho hľadiska je potrebné tiež zdôrazniť početnosť zvierat zapojených v systéme kontroly úžitkovosti, ktorú na Slovensku zabezpečujú PS SR, š.p. Celkom bolo k 31.10.2012 zapojených 23 607 ks kráv a 24 236 ks mladého dobytka. Informácie a výsledky monitorovania úžitkových vlastností, ktoré kontrola úžitkovosti prináša, sú nevyhnutné pri ďalšom napredovaní v chovoch.

Ktoré mäsové plemená na Slovensku patria medzi najpočetnejšie a aké sú ich prednosti?

Na Slovensku je uznaných 12 mäsových plemien - Aberdeen Angus (AA), Blonde d'Aquitaine (BA), Belgické modré (BB), Galloway (GL), Hereford (HE), Highland (HL), Charolais (CH), Limousine (LI), Simentál mäsový (SM), Maďarský stepný dobytok (SD), Piemontese (PI) a Gasconne (GA). Medzi najpočetnejšie plemená patria CH, LI, SM, AA, BA. Jednotlivé plemená sú charakterizované v schválených šľachtiteľských programoch. Výber mäsových plemien na Slovensku je tak v súčasnosti dostatočne široký. Vo všeobecnosti však odborníci na mäsové plemená zastávajú názor, že samotné plemeno sa na úspechu chovateľa podieľa len desiatimi percentami. Dôležitejšie je chovateľské prostredie, ktoré zvieratám daného plemena v chovateľskom prostredí zabezpečíme.

Aké produkčné ukazovatele dosahujeme v porovnaní so zahraničím?

Aj keď technológia chovu dojčiacich kráv na Slovensku nemá dlhú tradíciu, chovu sa podľa dostupných údajov venuje v KÚ 292 fariem. Je pozitívne, že stúpa početnosť kráv v jednotlivých stádach. Najväčšie chovy (zdroj ZCHMD) sú: DONA s.r.o. Veľké Revíšťia, (286 ks kráv), Poľnoslužby Čabiny s.r.o. (277), AGRO-RACIO s.r.o. Liptovský Mikuláš (280), Agro Mútne s.r.o. (220) a Agrotrade Group s.r.o. Rožňava (192). Medzi najväčších chovateľov na Slovensku, ktorí vykonávajú kontrolu úžitkovosti patria ROTAX-ARCH spol. s r.o. (661 ks kráv, 631 ks mladého dobytka), Poľnohospodárske družstvo Javorina Malcov (364/239), Poľnohospodárske družstvo Strážne (291/198), Poľnohospodárske družstvo v Roštári (286/290), Poľnoslužby Čabiny spol. s r.o. (284/324), PASIENKOVÁ SPOLOČNOSŤ BOROV s.r.o.(277/360), Agro - Racio s.r.o (260/192), BROVA, spol.s.r.o. (258/233), ČIERNA HORA, a.s. Valaská Belá (255/204), Poľnohospodárske

družstvo LČV so sídlom v Čimhovej (234/327).

Čo je dôležité vedieť pre chovateľa, ktorý sa rozhodne pre chov mäsových plemien bez tržnej produkcie mlieka, aké sú najväčšie úskalia chovu týchto zvierat?

V prvom rade to musí byť chovateľ, ktorý od začiatku vie čo chce a súčasne chce byť najlepší. Stále platí, že je to o ľudoch. Sú to ľudia, ktorí robia výsledky. Samozrejmostou je zaevidovanie farmy v Centrálnej evidencii hospodárskych zvierat, so súhlasmom ŠVPS. Je potrebné si hned' na začiatku stanoviť krátkodobé, strednodobé aj dlhodobé ciele a úlohy. Chov kráv bez trhovej produkcie mlieka je systém s mnohými premennými. Predtým, než začneme, je dobré nájsť si funkčný, ekonomicke úspešný vzor (chovateľa), podľa ktorého si vybudujeme svoj chov. Nevymýšľajme veci, ktoré sú dávno známe a praxou overené. Nespoliehajme sa od začiatku na dotácie. Základné predpoklady zvládnutia technológie chovu dojčiacich kráv sú všeobecne známe. Prioritou je dobrý zdravotný stav zvierat, ochrana a prevencia voči chorobám. Chovateľ, ktorý sa rozhodne pre chov dojčiacich kráv - bez tržnej produkcie mlieka, musí byť predovšetkým ekonomicke úspešný.

Aké sú prednosti chovu v tejto kategórii?

Mäsové plemená dobytka netvorili do roku 1989 ani jedno percento z celkovej populácie HD chovaného na Slovensku. Po transformácii chovatelia, ktorí vyrábali mlieko nerentabilne, prešli na chov dojčiacich kráv. Tento prechod vyžadoval pochopiť spôsob technológie chovu a nasmerovať ho na sezónne telenie a zvládnutie reprodukcie využitím býkov v prirodzenej plemenitbe. Práve skutočnosť, že Slovensko dlhodobo disponuje výrazným potenciálom trvalých trávnych porastov ako krmovinového zdroja, potvrdzuje potenciál pre rast chovu dojčiacich kráv aj pre budúce obdobie. Chov dojčiacich kráv na Slovensku sa tak stal chovateľskou alternatívou pre tých, ktorí disponujú pozemkami s trvalými trávnymi porastmi, ako aj lúkami a pasienkami na ornej pôde.

Aké produkčné parametre by mal dosahovať mäsový dobytok?

Jednotlivé plemená sa od seba v jednotlivých parametroch typicky odlišujú. Konkrétnie odlišnosti v úžitkových vlastnostiach nájdeme v spracovaných plemenných štandardoch. Ekonomika v systéme chovu dojčiacich kráv sa odvíja najmä od počtu narodených teliat. Pravidlom je mať jedno teľa od jednej kravy za rok. Je preto nutné sústrediť naše opatrenia tak, aby odstav teliat na 100 ks kráv neboli menší ako 85 - 90 ks. Medziobdobie by malo byť 360 - 390 dní. V závislosti od plemena je vek kráv pri 1. otelení do 30, resp. 35 mesiacov. Dobrá reprodukcia a plodnosť je jednoznačne u všetkých mäsových plemien dobytka rozhodujúcim predpokladom ekonomiky chovu. Aj preto je práca s plemenným býkom v stáde a jeho príprava na pripúšťanie dôležitým faktorom. Využívanie plemenného býka vhodne dopĺňame insemináciou. Cestou kontroly úžitkovosti sledujeme optimálnosť priemerných prírastkov hmotnosti (hmotnosť pri narodení, vo veku 120 dní, 210 dní a 365 dní). Súčasťou kontroly úžitkovosti je aj hodnotenie obtiažnosti pôrodotov vyjadrené percentom ľahkých pôrodotov. Dosahované denné prírastky hmotnosti s ktorými sa stretávame v zahraničí sú na úrovni 1200 g – 1600 g.

Sú dosahované parametre v porovnaní s chovateľskými vyspelými krajinami postačujúce?

Sú chovy, ktoré sa už dnes ničím nelisia od vyspelých zahraničných chovov ani vo vytvorenom chovateľskom prostredí, ani v kvalite zvierat. Pravdou je, že niektoré sledované parametre u nás stále zaostávajú. Je čo zlepšovať v odchove teliat, medziobdobí a v zvládnutí sezónnosti telenia. Napriek tomu treba opäťovne zdôrazniť, že mnohí naši chovatelia dosahujú vynikajúce výsledky, porovnatelné s vyspelými chovateľskými krajinami. Manifestácia fenotypu je podmienená v značnej miere chovateľským prostredím. Plemenitba, šľachtenie, moderné biotechnológie a kontrola úžitkovosti sú základ k úspechu.

Aké sú očakávania v najbližšom období a prečo by sa mal podporovať chov mäsového dobytka na Slovensku?

Pre živočíšnu výrobu na Slovensku očakávame zložitý rok 2013. Prečo by sme mali vo všeobecnosti viac podporovať u nás chov dobytka? Dôvodov je viac. Slovensko dlhodobo v spotrebe mlieka a mliečnych výrobkov zaostáva za EÚ, ktorej priemerná spotreba mlieka a mliečnych výrobkov je asi 300 kg na obyvateľa. Menej sa hovorí a píše, že obdobná situácia je aj v spotrebe hovädzieho mäsa. Pritom hovädzie mäso patrí k najhodnotnejším druhom mäsa predovšetkým kvôli plnohodnotným bielkovinám. Sto gramový hovädzí steak dodá 20 gramov bielkovín. Rovnaké množstvo prinesú štyri jogurty alebo sedem deka ementálu. Hovädzie mäso je pre človeka významným zdrojom železa, obsahuje veľa zinku, selénu, kyseliny listovej a vitamínu B12. Kým v roku 1990 spotreba hovädziny na obyvateľa SR dosiahla 22,1 kg a bola porovnatelná so západnými krajinami, v súčasnosti je to necelých 5,0 kg. Spotreba teľacieho mäsa od roku 2003 klesla dokonca z 0,15 kg na 0,04 kg. Vo vyspelých členských krajinách EU12 je spotreba hovädzieho mäsa na úrovni 50–70 kg. V krajinách ako USA, Argentína, Austrália a Nový Zéland dokonca 80–100 kg.

Je potrebné, aby sa vytvorili podmienky pre zvýšenú spotrebu domáceho a súčasne kvalitného hovädzieho mäsa a výrobkov vyrobených na Slovensku (udržanie podpôr cez vyplácanie na veľkú dobytčiu jednotku). Žiaľ nízka kúpschopnosť obyvateľstva nás mnohokrát nútí kúpať mäso a výrobky v cenových reláciách, kde nemôžeme očakávať potrebnú kvalitu. Skrátka nízka cena znamená aj nízku kvalitu.

Pre zlepšenie aktuálnej situácie, cestou informovania, propagácie a poradenstva chcú tomu určite napomôcť aj Plemenárské služby SR, š.p.

**Výsledky kontroly úžitkovosti

Priebeh pôrodu:

0 = Nezistený

1 = Normálny

2 = S pomocou

3 = Veterinár

4 = Veľmi ťažký - cisársky rez

Plemenná príslušnosť

1. Belgické modré BB

BBM1 dedičný podiel príslušného mäsového plemena dobytka je 96,80 % a viacej,
BBM2 dedičný podiel príslušného mäsového plemena dobytka je 93,75 % - 96,79 %,
BBM3 dedičný podiel príslušného mäsového plemena dobytka je 87,50 % - 93,74 %,
BBM4 dedičný podiel príslušného mäsového plemena dobytka je 75,00 % - 87,49 %,
BBM5 dedičný podiel príslušného mäsového plemena dobytka je 50,00 % - 74,99 %.

2. Aberdeen Angus AA

AA M1 dedičný podiel príslušného mäsového plemena dobytka je 96,80 % a viacej,
AA M2 dedičný podiel príslušného mäsového plemena dobytka je 93,75 % - 96,79 %,
AA M3 dedičný podiel príslušného mäsového plemena dobytka je 87,50 % - 93,74 %,
AA M4 dedičný podiel príslušného mäsového plemena dobytka je 75,00 % - 87,49 %,
AA M5 dedičný podiel príslušného mäsového plemena dobytka je 50,00 % - 74,99 %.

3. Blonde d'Aquitaine BA

BA M1 dedičný podiel príslušného mäsového plemena dobytka je 96,80 % a viacej,
BA M2 dedičný podiel príslušného mäsového plemena dobytka je 93,75 % - 96,79 %,
BA M3 dedičný podiel príslušného mäsového plemena dobytka je 87,50 % - 93,74 %,
BA M4 dedičný podiel príslušného mäsového plemena dobytka je 75,00 % - 87,49 %,
BA M5 dedičný podiel príslušného mäsového plemena dobytka je 50,00 % - 74,99 %.

4. Galloway GL

GL M1 genetický podiel mäsového plemena Galloway je 100,0 %

5. Hereford HE

HE M1 dedičný podiel príslušného mäsového plemena dobytka je 96,80 % a viacej,
HE M2 dedičný podiel príslušného mäsového plemena dobytka je 93,75 % - 96,79 %,
HE M3 dedičný podiel príslušného mäsového plemena dobytka je 87,50 % - 93,74 %,
HE M4 dedičný podiel príslušného mäsového plemena dobytka je 75,00 % - 87,49 %,
HE M5 dedičný podiel príslušného mäsového plemena dobytka je 50,00 % - 74,99 %.

6. Highland HL

HL M1 genetický podiel mäsového plemena Highland je 100,0 % .

7. Charolais CH

CH M1 dedičný podiel príslušného mäsového plemena dobytka je 96,80 % a viacej,
CH M2 dedičný podiel príslušného mäsového plemena dobytka je 93,75 % - 96,79 %,
CH M3 dedičný podiel príslušného mäsového plemena dobytka je 87,50 % - 93,74 %,
CH M4 dedičný podiel príslušného mäsového plemena dobytka je 75,00 % - 87,49 %,
CH M5 dedičný podiel príslušného mäsového plemena dobytka je 50,00 % - 74,99 % .

8. Limousine LI

LIM1 dedičný podiel príslušného mäsového plemena je 96,80 % a viacej,
LIM2 dedičný podiel príslušného mäsového plemena je 93,75 % - 96,79 %,
LIM3 dedičný podiel príslušného mäsového plemena je 87,50 % - 93,74 %,
LIM4 dedičný podiel príslušného mäsového plemena je 75,00 % - 87,49 %,
LIM5 dedičný podiel príslušného mäsového plemena je 50,00 % - 74,99 %.

9. Maďarský stepný dobytok SD

SD M1 genetický podiel mäsového plemena Maďarský stepný dobytok je 100,0 % .

10. Piemontese PI

PI M1 dedičný podiel príslušného mäsového plemena dobytka je 96,80 % a viacej,
PI M2 dedičný podiel príslušného mäsového plemena dobytka je 93,75 % - 96,79 %,
PI M3 dedičný podiel príslušného mäsového plemena dobytka je 87,50 % - 93,74 %,
PI M4 dedičný podiel príslušného mäsového plemena dobytka je 75,00 % - 87,49 %,
PI M5 dedičný podiel príslušného mäsového plemena dobytka je 50,00 % - 74,99 %.

11. Simmental mäsový SM

SM M1 dedičný podiel príslušného mäsového plemena dobytka je 96,80 % a viacej,
SM M2 dedičný podiel príslušného mäsového plemena dobytka je 93,75 % - 96,79 %,
SM M3 dedičný podiel príslušného mäsového plemena dobytka je 87,5 % - 93,74 %,
SM M4 dedičný podiel príslušného mäsového plemena dobytka je 75,0 % - 87,49 %,
SM M5 dedičný podiel príslušného mäsového plemena dobytka je 50,0 % - 74,99 %.
